Publications

Feature based approach for Intelligent Frame Extraction of Events for Cricket Highlight Generation using Support Vector Machine

Bilal Awan

Full Stack Developer | MEAN | MERN | JavaScript | Frontend | React | Angular | TypeScript | Backend | Node | PHP | Laravel | Consultant | Open to C2C/W2 Contract
Dallas-Fort Worth Metroplex

Summary

I'm a Senior Full Stack Engineer with 8+ years of experience building and scaling web applications across product companies and enterprise clients. Some highlights from recent work: Designed a Node.js backend at Nextbridge that maintained 99.9% uptime and improved load speeds by 45%. Automated workflows at Raaziq International using React and Node.js, saving the team 80+ hours per month. Simplified a complex onboarding flow at LogLeads, enabling 2,000+ new users to get started with minimal friction. I work across the full stack, from React frontends to Node.js/ NestJS backends, AWS deployments, and PostgreSQL/MongoDB databases. I've led Agile teams and know how to communicate clearly across engineering and product. For US recruiters and hiring managers: I hold an approved H-1B visa with a valid stamp. Any offer simply requires filing an H-1B transfer (I-129) with no lottery and no delay. Premium processing typically takes 2 to 4 weeks. I am available within 4 to 6 weeks of transfer approval. Actively exploring full-stack roles, contract or full-time. Stack: JavaScript · TypeScript · React · Node.js (Express and NestJS) · AWS · PHP/ Laravel · PostgreSQL · MongoDB · Microservices · Docker

Experience

iBuildsoft LLC

Senior Software Engineer

January 2025 - Present (1 year 8 months)

United States

- Designed and developed core application features across cybersecurity compliance, education SaaS, and internal tools.
- Worked with CMMC and NIST SP 800-171 frameworks to build assessment workflows, scoring logic, evidence tracking, and automated compliance evaluations.

- Contributed to full-stack development, including backend data models, API design, dashboard interfaces, and reporting modules.
- Implemented LLM-powered analysis to improve recommendations, gap detection, and automated review processes.
- Delivered scalable architecture improvements, optimized database operations, and ensured secure data handling across systems.
- Supported AWS-based DevOps tasks including EC2 deployments, S3/Lambda integration, CI/CD pipelines, and environment configuration.
- Collaborated closely with product and cross-functional teams to refine requirements, improve UX, and ensure smooth delivery.
- Developed and maintained modules for a multi-branch school management SaaS, integrating systems like Google Classroom, Clever, and QuickBooks.
- Focused on clean development practices, documentation, and continuous enhancement of existing codebases.

Confiz

Senior Software Engineer

September 2023 - December 2024 (1 year 4 months)

Bellevue, WA

- Spearheaded React development for a legacy internet marketing platform, elevating user experience and functionality.
- Led the integration of instructional videos, interactive quizzes, and progress tracking into educational platforms, cutting administrative workload by 2 hours weekly per instructor.
- Architected tracking dashboards with Firebase, optimizing data processing and improving response times by 40%.

LogLeads Compendium

Full Stack Engineer

July 2022 - September 2023 (1 year 3 months)

Sydney, New South Wales, Australia

- Revamped workflows with custom visual interfaces aligned to Figma layouts, increasing task completion speed during testing.
- Simplified complex functionalities into user-friendly designs, facilitating the successful onboarding of 2,000+ new users within three months.
- Integrated RESTful APIs and WebRTC, boosting real-time communication and increasing 1,500 daily active users.

10Pearls

Senior Software Engineer

December 2021 - June 2022 (7 months)

Lahore, Punjab, Pakistan

- Architected a scalable backend with Node.js, Redis, and MongoDB, ensuring 99.9% uptime and integrating seamlessly with React, Next.js, and Tailwind CSS, enhancing load speeds by 45%.
- Led the optimization of server-side architecture to support 1 million+ concurrent users, reducing latency by 60% and ensuring zero downtime while mentoring team members on performance tuning techniques.
- Crafted workflow UI based on Figma, enabling 100K+ users to automate actions dynamically, improving task efficiency by 35%.

Nextbridge Ltd.

2 years 8 months

Senior Software Engineer

November 2020 - November 2021 (1 year 1 month)

Lahore

- Innovated and implemented full-stack web applications in an Agile environment, utilizing cutting-edge technologies for efficient, scalable solutions.
- Improved code quality by 40%, reducing the product launch timeline by 2 weeks and boosting system performance by 35% through refactoring 5,000+ lines of legacy code.
- Amplified responsive web app foundation with React, React Native, Next.js, TypeScript, Tailwind CSS, and Vue.js.

Software Engineer

April 2019 - November 2020 (1 year 8 months)

Lahore, Pakistan

- Worked on microservices-based apps using MEAN/MERN stack, ensuring scalability and efficiency.
- Responsible for containerizing sub-applications and deploying them on live environments.
- Gained hands-on experience with JavaScript frameworks and libraries, including AngularJS, Angular (7, 8, 9), React.js, Vue.js, and Node.js.
- Contributed to the development and maintenance of high-performing applications at Nextbridge, a leading offshore software development company.

Raaziq International PVT LTD

Software Engineer

January 2018 - April 2019 (1 year 4 months)

Lahore, Punjab, Pakistan

- Built High-performance applications with Angular and Node.js, automating workflows and saving 80+ hours manpower monthly.
- Maintained 95% uptime for server-side services, optimizing query execution by 75% and increasing user satisfaction by 20%.
- Developed a SaaS platform integrating HR management, CRM, freight management, payroll, and company operations, streamlining business processes for 1,000+ users

Wali Systems Inc.

Software Engineer

September 2016 - December 2017 (1 year 4 months)

Lahore District

- Directed user interaction analysis through API integration, generating 3,500 targeted leads by refining outreach strategies and guiding the team in optimizing lead generation processes.
- Enforced strict code quality standards, achieving 99.9% application reliability through comprehensive testing and debugging.
- Spearheaded the acceleration of core functionality responsiveness by optimizing client-side scripting, reducing transaction cycle time by over 2 seconds while mentoring junior developers.
- Developed applications using Angular, Vue.js, Laravel, and CodeIgniter frameworks.
- Customized and enhanced Sugar & Suite CRM, including the creation and modification of Sugar Packages/Modules.
- Integrated APIs and REST APIs to enhance system functionalities.

Education

University of Management and Technology - UMT

Bachelor of Science - BS, Computer Software Engineering · (2012 - 2016)
